EDUCATION

Meenakshi Sundararajan Engineering College

Bachelor of Engineering in Computer Science and Engineering; CGPA: 8.56/10

Chennai, India

2024 – 2028

EXPERIENCE

Founder & Software Engineer

Sep 2025 – Present

Quroix Labs

Chennai, India

- Architected and led engineering delivery for a 10-person software studio, shipping 15+ production-grade systems, resulting in **30% faster delivery cycles** by standardizing architecture and deployment pipelines across the team.
- Designed end-to-end technical solutions – system architecture, API design, database schema, and deployment pipelines – cutting client onboarding and delivery time by **25%** by translating requirements into production-ready specifications.
- Built reusable workflow automation systems and internal tooling, eliminating **10+ hours/week of manual work** for client businesses through standardized version-control and deployment practices.

PROJECTS

AutoPentest AI | *React.js, TypeScript, Tailwind CSS, AI, Git, Vite*

- Designed an AI-powered penetration testing assistant, reducing manual reconnaissance and reporting time by **40%**, by automating vulnerability assessment and security report generation.
- Engineered a modular React and TypeScript frontend, supporting **10+ reusable components across 5 dashboard views**, resulting in a scalable, maintainable project architecture and improved user experience.
- Integrated AI-assisted security analysis, cutting report turnaround time from **2 hours to under 20 minutes**, by automating manual penetration testing steps.
- Applied modern software engineering practices, including component-based development, Git version control, responsive design, and deployment-ready architecture.

SkillSnap AI | *Python, AI, React, Next.js*

- Built an AI-powered resume analysis platform, scoring **100+ resumes** with **85%+ accuracy against recruiter benchmarks**, to assist candidate profile assessment and hiring readiness.
- Implemented automated resume parsing and feedback, improving resume quality scores by **20%** for candidates who used the platform.
- Designed an interactive dashboard, used by **5+ hackathon judges and testers**, delivering structured resume scoring, candidate insights, and evaluation reports.
- Collaborated within a hackathon team to rapidly prototype, develop, and deliver a functional AI-powered application under time constraints.

Brain Tumor Prediction using CNN | *Python, TensorFlow, Keras, CNN, Streamlit*

- Developed a convolutional neural network using TensorFlow and Keras to classify brain MRI images across multiple diagnostic categories, achieving 99% classification accuracy.
- Built an end-to-end machine learning pipeline covering image preprocessing, model training, evaluation, and real-time inference.
- Designed and deployed a Streamlit-based web application enabling users to upload MRI scans and receive instant, AI-driven predictions.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend & Backend: React.js, Node.js, Express.js, Tailwind CSS, Vite, REST APIs

Artificial Intelligence: Machine Learning, Deep Learning, TensorFlow, Keras, Scikit-learn, CNN, Computer Vision, Medical Image Analysis, RAG, SLMs, Ollama

Databases: MySQL, Firebase, Supabase

Developer Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Postman, Vercel

ACHIEVEMENTS

Secured top finishes across multiple national hackathons and technical competitions by developing AI-powered and full-stack software solutions under strict time constraints.

Received the **Best Innovation Award** at the Sri Sairam Institute of Technology Techno Sprint Hackathon for designing and presenting an AI-driven software solution.

Completed the **Machine Learning Specialization** from Stanford University and DeepLearning.AI through Coursera.
